

**IF IT'S NOT  
EASY TO USE,  
WE WON'T USE IT.**

**RHINO™ 5000 is the labeling tool you can trust, all around your facility.** With so many things to label under your roof, you need a rugged portable that won't collect dust. RHINO 5000 is so versatile, you're sure to grab it – without a second thought.

Built for speed and durability, RHINO 5000 is the professional way to label cables, network components, equipment and machinery, storage racks and bins, signage and more. "Hot Keys" make each task a breeze. Its backlit display stays visible even in dark areas. And the impact-resistant rubber bumper protects your investment.

**RHINO labels stick and stay stuck.** A labeling tool is only as reliable as the labels it produces. That's why our easy-load, split-back labels resist heat, UV exposure, moisture and more. Plus, with industrial-strength adhesives, RHINO labels stay in place, without curling up or falling off.

**Get your facility more organized than ever.  
Get RHINO 5000 and get the job done.**
